

Deliverables Included

The submission contains all the required deliverables organized phase-wise in separate folders for clarity and easier evaluation.

Included Items

- **Agent Source Code / Flowise Export**

- Complete agent implementation source code and related Flowise exports.
- Clear setup and run instructions are included for each phase.

- **Problem Framing Document**

- A detailed 1–2 page document explaining:

- Problem definition
- Objectives
- Scope
- Constraints
- Expected outcomes

- **Demo Script and Evidence**

- Demo scenarios containing 3–5 forced interaction examples.
- Supporting execution evidence including:

- Logs
- Screenshots
- Output samples

- **Prompt Comparison & Analysis**

- Comparison table using the same test set across multiple prompt variants.
- Includes observations, performance differences, and insights gathered from testing.

- **Evaluation & Debugging Report**

- Evaluation metrics and testing observations.
- Includes at least one documented failure case with:
 - Root cause analysis
 - Debugging process
 - Fix implemented

- Before/after proof of improvement

- **Engineering & Product Justification**

- Explanation of:
 - Design decisions
 - Architecture choices
 - Tradeoffs considered
 - Safety and reliability approach
 - Deployment assumptions and scalability considerations

Repository Organization

Each phase has been organized into separate folders containing:

- Source scripts
- PDF reports
- Logs
- Screenshots
- Supporting documents
- Evaluation artifacts
- Configuration/setup files

This structure ensures easy navigation, reproducibility, and clear tracking of progress across all project phases.
